

SPRING 2010 VDFP FUNDED TECHNICAL RESCUE CLASSES
UPDATE 02/02/10 – Regional School Information ADDED
****subject to change and update****

The following is a list of scheduled funded Technical Rescue courses for the Spring 2010. This list is to be used for planning purposes only and not registration. Class size is limited and courses fill up quickly once advertised.

There are other courses being offered at the Regional Schools throughout the Commonwealth, but those will be advertised and registrations handled through those hosting agencies. They should be advertised on the VDFP website under “Upcoming Events” at the appropriate times. Those registrations are not handled through the Technical Rescue Division Office and make involve course fees payable to the regional school. **Tentative courses are listed bottom of this announcement.**

There are also numerous reimbursable classes in the Commonwealth. These courses are handled by the jurisdictions which are funding them. VDFP does not advertise or accept online registrations for these courses unless requested to do so by the hosting agency. They are not included in this list.

Also, if you do register for a class, then you are responsible to notify VDFP if you choose to withdraw. VDFP will be implementing a “No-Show” policy to address the problem of students registering for classes and then not showing up for class. Please be considerate of your fellow students.

DO NOT CONTACT either VDFP or the hosting jurisdiction to register for the classes listed.

- Classes will be advertised online in FSTRS at the appropriate time.
- All registrations for students outside of hosting agency will be handled online through FSTRS.
- VDFP does not have any type of pre-registration/notification of when classes are advertised.
- There is no “Waitlist” available for classes which are full.
- If the course is no longer advertised on FSTRS, then there are no seats available in that class.
- All classes are removed from FSTRS 10 days prior to the start of class.

If you have any questions regarding class pre-requisites or registration procedures, then please feel free to contact Sam Burnette, Technical Rescue Division Chief at 804-249-1969. This list is subject to change and update at anytime without notice.

VDFP Technical Rescue Course for Spring 2010
