Executive Summary

Fire service in Virginia has the responsibility to be prepared to respond to many different types of situations and events. Firefighters respond to all types of fires, but also have to be equipped to handle medical emergencies, rescue operations, hazardous conditions, and severe weather occurrences. Fire service also performs many tasks of providing public service assistance to their local communities.

VFIRS Participation

For calendar year 2009, 482 or 83.4% of the total 578 fire departments in Virginia reported incidents to VFIRS. Based on each locality's VFIRS participation and census population, the departments that reported incidents for 2009 represent 95.3% of Virginia's population.

Incident Types

In 2009, fire departments responded to 645,498 incidents in Virginia. These incidents included 26,138 fires, 424,135 rescue/medical incidents, 30,518 hazardous condition calls, 40,819 service calls, 61,877 good intent calls, 54,579 false calls and 7,432 other calls. (See Table 1.) There were 34,352 incidents in which a fire department provided assistance (mutual or automatic aid given) to another jurisdiction. In addition, there were 440 fire incidents that were fire exposures (fires large enough to cause fire damage beyond the property where the fire started).

Chapter 1 - VFIRS - Introduction

Virginia Fire Incident Reporting System (VFIRS)

The Virginia Department of Fire Programs (VDFP) manages the reporting of incidents to the Virginia Fire Incident Reporting System (VFIRS). VFIRS is the statewide system for tracking all emergency responses with fire departments in Virginia. By reporting their incidents to VFIRS, fire departments document the details of their incidents for legal purposes and also document the overall activities with their fire department. By reporting their incidents, fire departments get credit for everything that they do in responding to incidents in their area. VFIRS also helps to show the value of a fire department's public service to their community.

VFIRS is an all-type incident reporting system. Fire departments should be reporting all their emergency responses to VFIRS. All types of calls such as fires, EMS, hazmat, etc. should be reported to reflect all incidents being handled.

Participation in VFIRS is essential, since important decisions, such as decisions with grant funding, are made at the fire department, local, state and federal levels using the incident data reported to the system. By analyzing the incident data, information on the frequency of call types, the causes of fires, the amount of loss from fires can easily be identified to help develop appropriate fire prevention plans, to essentially help "Fight Fires with Facts".

VFIRS Reporting Deadlines

Timeliness of reporting is critical to ensure the availability of current incident data. Fire departments should be consistently reporting incidents on a monthly basis. All incidents shall be reported (submitted) no later than the 15th of the calendar month for incidents that occurred in the previous month.

VFIRS Quality Control

In order to make sure that we have accurate and reliable data, quality control audits are performed at different times during the collection year. Reports are produced for each fire department in Virginia identifying incidents for them to review and correct or verify. The reports included are (1) Detailed Report of Invalid Incidents with Critical Error Messages, (2) High Dollar Loss Incident Report, (3) High Response / Duration Time Incident Report, (4) Fire Incidents with No Dollar Loss or Zero Dollar Loss Report, (5) Undetermined or Unresolved Fire Incidents for Factors Related to the Ignition of the Fire Report, (6) Building Fire Incidents with High Building Height, and (7) Fire Deaths Report. By getting departments to be aware of issues with their data, they will understand the importance of making sure that they have good data.

VFIRS Program Team

The VFIRS program is managed and administered by the following VDFFP staff: **Dwight E. Crews, Information and Statistics Manager**, and **Renee H. Tabb, Program Support Technician**.

Acknowledgements

We would like to thank all the fire departments in Virginia for their efforts in reporting their incidents to VFIRS. The program could not be successful without their valuable support and contribution. Fire departments in Virginia truly understand the importance of documenting what they do each day and they value the benefits of reporting their emergency responses.

The total incident rate per 1,000 Virginia residents has increased since 2005 from 82.5 to 95.7. The fire incident rate has remained closely the same over the years and had an incident rate of 3.9 per 1,000 residents in 2009. (See Table 8. and Figure 5.)

The estimated property and contents dollar loss is required for all fire incidents and help determine the magnitude of the loss of each incident. The total dollar loss reported with all fire incidents for 2009 was \$278,215,223. (See Table 11.) Structure fires accounted for the largest average (mean) dollar loss with \$26,694 per incident.

Casualties

Casualties are unfortunate losses that result from incidents and have a great impact on the public resulting in personal loss to families. Fire service equally suffers the loss and additionally results in a reduction of staff providing services. In 2009, there were a total of 450 civilian fire casualties (382 injuries and 68 deaths) caused by fire incidents. (See Table 14.) Fire service casualties with all types of incidents totaled 342 casualties and had 341 injuries and 1 death. (See Table 15.)

Fire Incidents

Fire departments reported in 2009 that they responded to 26,138 fire incidents during the year. (See Table 16.) Structure fires (37.1%) made up the largest incident category with fire incidents, while natural vegetation fires accounted for 24 percent. (See Figure 8.) Mobile property vehicle fires accounted for 17 percent of the total fires in 2009.

Aid Given or Received

Fire departments can give/receive aid to/from other fire departments in their area for incident calls that require additional resources. The aid given can be either mutual (fire departments request need for assistance) or automatic (pre-arranged agreement to aid).

Ninety-one percent (91.2%) of the incidents responded to by fire service in Virginia were incidents that did not involve mutual or automatic aid given or received. (See Figure 10.) The departments did not receive any aid from other fire departments or did not give aid to other fire departments. Fire departments in Virginia gave mutual / automatic aid with 5 percent of the total incidents.

Fire Exposures

Fire exposures are fire incidents that result from fires that have spread outside their area of origin to other properties. Source fires are the original fire that started at the incident scene. The fire exposures are the fires that have spread to other areas.

In 2009, there were 288 sources fires that spread 440 exposures fires. (See Table 18.) Fire exposures have a higher injury rate and death rate per 1,000 fires when compared to the rate with all fires. The average fire dollar loss with source and exposure fires was \$46,514, while the average (mean) dollar loss with all fires was \$11,783.

Date/Time of Incident

Fires occurred most frequently in the month of February (3,345 incidents), but in Virginia, January was the month with the most total incidents overall. (See Table 19.) Saturday was the day of the week with the most fires, accounting for 4,076 incidents. (See Table 20.) In addition, Friday overall had the most amount of calls for 2009 when accounting for all incidents.

Incidents occurred the least during the 4:00 a.m. hour of the day in Virginia. (See Table 21. and Figure 13.) Incidents occurred most frequently during the 5:00 p.m. hour of the day.

Response Time

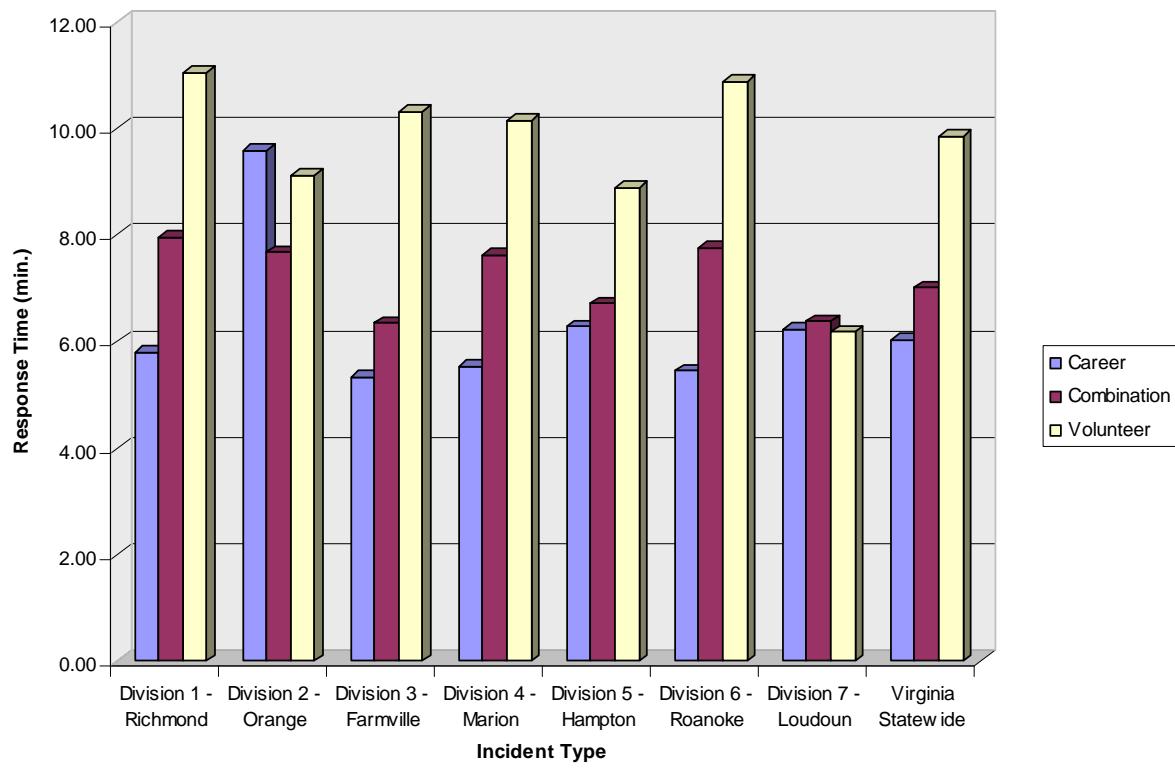

Fire department response time captures how timely response is provided to different types of situations in an area. Response time is the difference between the fire department arrival date/time and the fire department alarm date/time. The average response time for all fire departments in 2009 was 6.87 minutes. (See Table 22.) Career fire departments had an overall average response time of 6.03 minutes, while volunteer departments responded in 9.85 minutes.

Actions Taken

Fire department personnel have to perform multiple duties at an incident scene. Fifty-seven percent (56.6%) of all actions taken at an incident involved EMS and Transport duties. (See Table 23.) Activities concerning Information, Investigation, and Enforcement accounted for 18% of the actions taken.

Resources

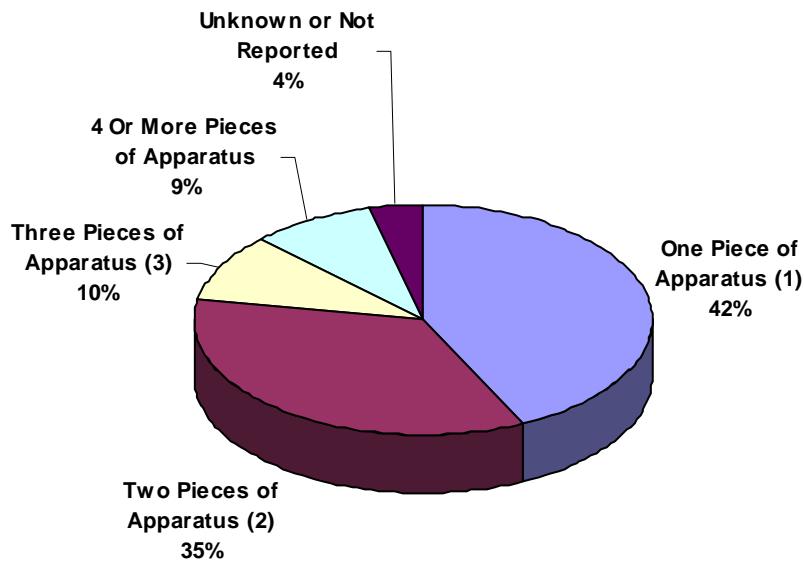

Fire service resources that respond to an incident consist of apparatus and personnel and can be classified as suppression, EMS, or other. The average number of apparatus that responded to an incident was 2.1. (See Table 25.) Fires required the largest number of apparatus for an incident and accounted for an average (mean) of 4.6 total apparatus per incident.

Forty-two percent (42%) of all reported incidents in 2009 required only one piece of apparatus to respond to the incident. Two pieces of apparatus were needed with 35% of the total incidents. (See Figure 16.)

Fire incidents required the largest amount of personnel for an incident with an average of 10.1 total personnel per incident. Forty-nine percent (49%) of all incidents needed 1 to 4 fire service personnel to respond to the emergency. (See Figure 17.)

Total Hours Committed

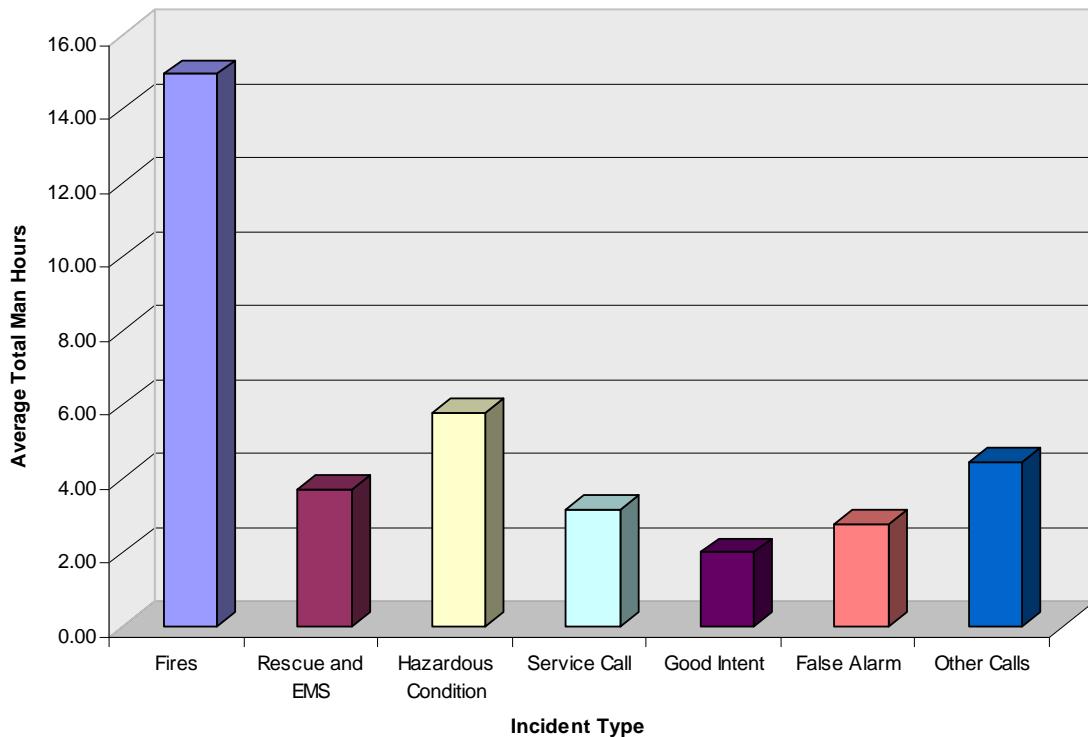

The total hours committed represents the total amount of time needed to handle and control an incident. Total hours committed for an incident is calculated by multiplying the total number of personnel by the duration time of the incident (Difference between the last unit cleared date/time and the alarm date/time).

Fire service in Virginia accumulated a total of 2,570,229 (2.6 million) hours responding to incidents in 2009. (See Table 27.) Fire incidents had the largest average total hours committed in 2009 with 14.93 hours. (See Figure 18.)

Property Use

Fire service incidents occurred at many different types of establishments and locations in Virginia in 2009. Each location of an incident had a specific property use. Fifty-three percent (52.6%) of incidents that fire service responded to occurred with residential property use establishments. (See Table 28.) Twenty percent (19.5%) of incidents occurred at a location outside or with special property use.

Residential Structure Fire Causes

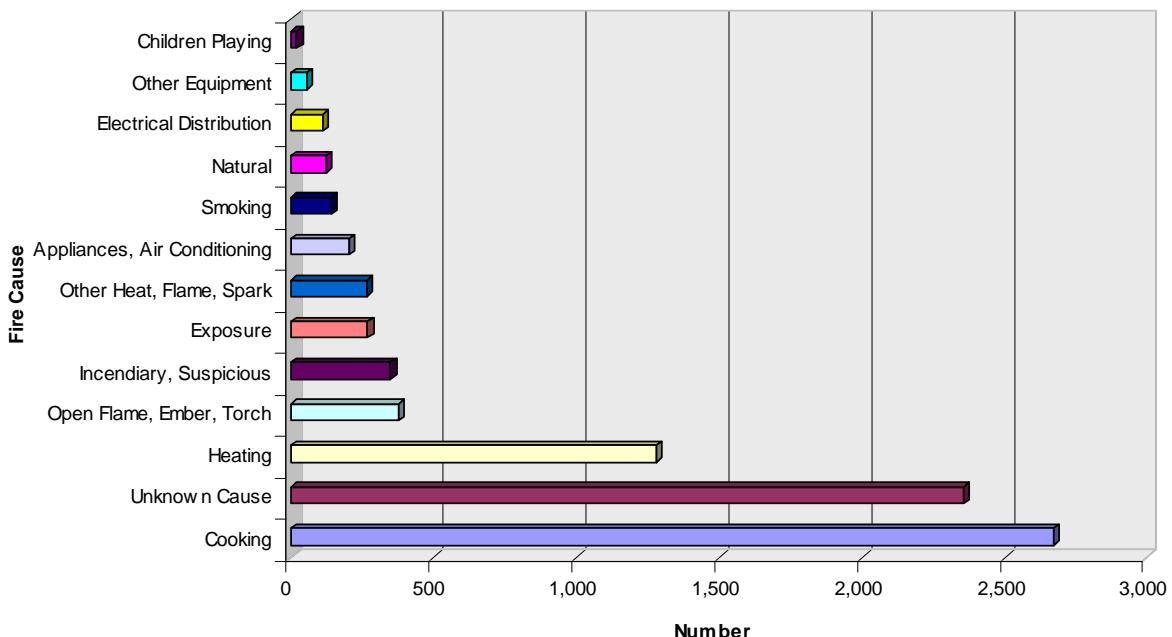

Cooking was the leading known fire cause with residential structure fires, and accounted for 32 percent of the incidents. (See Table 31. and Figure 21.) Heating made up 16% of the residential structure fire causes. Fires that were incendiary or suspicious accounted for 4% of the total fire causes.

Detector Use

Thirty-one percent (30.6%) of residential structure fires had a detector that operated & alerted the occupants. (See Table 32. and Figure 29.) Thirty-four percent (34.1%) of the fires had an unknown or undetermined detector use.

Note: Data is compiled from information reported to the Virginia Fire Incident Reporting System (VFIRS) for 2009 as of 03/05/2010.

Unless otherwise noted, for all frequency or incident counts, mutual/automatic aid given and fire exposure incidents were excluded from the numbers. For casualty statistical information, mutual/automatic aid given incidents were included for all fire service and excluded for all civilian data, and, in addition, fire exposure incidents were included with all casualty numbers. For dollar loss amounts, mutual/automatic aid given incidents were excluded and exposure incidents were included with the numbers.

Percentages may not add to totals due to rounding.

Note: Data is compiled from information reported to the Virginia Fire Incident Reporting System (VFIRS) for 2009 as of 03/05/2010. VFIRS participating fire department is any department that reported incidents to VFIRS for 2009. VFIRS Population Protected is based on each locality's VFIRS participation and census population and represents the percentage of Virginia's population that is covered by the reporting departments.

* Greenville County does not currently have fire service in their locality. Emergency response for their area is handled by Jarrett Vol. Fire Dept. (FDID 18301) and Emporia Fire Dept. (FDID 59500).

** The City of Falls Church (FIPS 610) currently participates in VFIRS, but due to contractual arrangements with Arlington County (FIPS 013), their statistical information cannot be tabulated and, therefore, is combined with the incidents from Arlington County.

Note: Data is compiled from information reported to the Virginia Fire Incident Reporting System (VFIRS) for 2009 as of 03/05/2010. For all frequency or incident counts, mutual/automatic aid given and fire exposure incidents were excluded from the numbers. For casualty statistical information, mutual/automatic aid given incidents were included for all fire service and excluded for all civilian data, and, in addition, fire exposure incidents were included with all casualty numbers. For dollar loss amounts, mutual/automatic aid given incidents were excluded and exposure incidents were included with the numbers.

* Greenville County does not currently have fire service in their locality. Emergency response for their area is handled by Jarrett Vol. Fire Dept. (FDID 18301) and Emporia Fire Dept. (FDID 59500).

** The City of Falls Church (FIPS 610) currently participates in VFIRS, but due to contractual arrangements with Arlington County (FIPS 013), their statistical information cannot be tabulated and, therefore, is combined with the incidents from Arlington County.

Note: Data is compiled from information reported to the Virginia Fire Incident Reporting System (VFIRS) for 2009 as of 03/05/2010. For all frequency or incident counts, mutual/automatic aid given and fire exposure incidents were excluded from the numbers. For casualty statistical information, mutual/automatic aid given incidents were included for all fire service and excluded for all civilian data, and, in addition, fire exposure incidents were included with a casualty numbers. For dollar loss amounts, mutual/automatic aid given incidents were excluded and exposure incidents were included with the numbers.

* Greenville County does not currently have fire service in their locality. Emergency response for their area is handled by Jarrett Vol. Fire Dept. (FDID 18301) and Emporia Fire Dept. (FDID 59500).

** The City of Falls Church (FIPS 610) currently participates in VFIRS, but due to contractual arrangements with Arlington County (FIPS 013), their statistical information cannot be tabulated and, therefore, is combined with the incident from Arlington County.

Note: Data is compiled from information reported to the Virginia Fire Incident Reporting System (VFIRS) for 2009 as of 03/05/2010. For all frequency or incident counts, mutual/automatic aid given and fire exposure incidents were excluded from the numbers. For casualty statistical information, mutual/automatic aid given incidents were included for all fire service and excluded for all civilian data, and, in addition, fire exposure incidents were included with all casualty numbers. For dollar loss amounts, mutual/automatic aid given incidents were excluded and exposure incidents were included with the numbers.

* Greenville County does not currently have fire service in their locality. Emergency response for their area is handled by Jarrett Vol. Fire Dept. (FDID 18301) and Emporia Fire Dept. (FDID 59500).

** The City of Falls Church (FIPS 610) currently participates in VFIRS, but due to contractual arrangements with Arlington County (FIPS 013), their statistical information cannot be tabulated and, therefore, is combined with the incidents from Arlington County.

Note: Data is compiled from information reported to the Virginia Fire Incident Reporting System (VFIRS) for 2009 as of 03/05/2010. The total number of incidents include all incidents reported to VFIRS and include mutual/automatic aid given and fire exposure incidents. The total number of incidents may not match other tables due to the different groupings of incident data. VFIRS participating fire department is any department that reported incidents to VFIRS for 2009. Fire departments shown above with dashes (-) did not report any incidents .

Note: Greensville County does not currently have fire service in their locality. Emergency response for their area is handled by Jarrett Vol. Fire Dept. (FDID 18301) and Emporia Fire Dept. (FDID 59500).

* Falls Church Vol. Fire Dept. (FDID 61000) currently participates in VFIRS, but due to contractual arrangements with Arlington Co. Fire Dept. (FDID 01300), their statistical information cannot be tabulated and, therefore, is combined with the incidents from Arlington County.

Note: Data is compiled from information reported to the Virginia Fire Incident Reporting System (VFIRS) for 2009 as of 03/05/2010. For all frequency or incident counts, mutual/automatic aid given and fire exposure incidents were excluded from the numbers. For casualty statistical information, mutual/automatic aid given incidents were included for all fire service and excluded for all civilian data, and, in addition, fire exposure incidents were included with all casualty numbers. For dollar loss amounts, mutual/automatic aid given incidents were excluded and exposure incidents were included with the numbers. The total number of fire departments may not match other tables due to different groupings of departments by locality.

Note: Greensville County does not currently have fire service in their locality. Emergency response for their area is handled by Jarrett Vol. Fire Dept. (FDID 18301) and Emporia Fire Dept. (FDID 59500).

* The City of Falls Church (FIPS 610) currently participates in VFIRS, but due to contractual arrangements with Arlington County (FIPS 013), their statistical information cannot be tabulated and, therefore, is combined with the incidents from Arlington County.

Note: Data is compiled from information reported to the Virginia Fire Incident Reporting System (VFIRS) for 2009 as of 03/05/2010. For all frequency or incident counts, mutual/automatic aid given and fire exposure incidents were excluded from the numbers. For casualty statistical information, mutual/automatic aid given incidents were included for all fire service and excluded for all civilian data, and, in addition, fire exposure incidents were included with all casualty numbers. For dollar loss amounts, mutual/automatic aid given incidents were excluded and exposure incidents were included with the numbers. The total number of fire departments may not match other tables due to different groupings of departments by locality.

Note: Greensville County does not currently have fire service in their locality. Emergency response for their area is handled by Jarrett Vol. Fire Dept. (FDID 18301) and Emporia Fire Dept. (FDID 59500).

* The City of Falls Church (FIPS 610) currently participates in VFIRS, but due to contractual arrangements with Arlington County (FIPS 013), their statistical information cannot be tabulated and, therefore, is combined with the incidents from Arlington County.
