## Chapter 1 Executive Summary

Fire service in Virginia has the responsibility to be prepared to respond to many different types of situations and events. Firefighters respond to all types of fires, but also have to be equipped to handle medical emergencies, rescue operations, hazardous conditions, and severe weather occurrences. Fire service also performs many tasks of providing public service assistance to their local communities.

### VFIRS Participation

For calendar year 2015, 487 or 74.9% of the total 650 fire departments in Virginia reported incidents to VFIRS.

### Incident Types

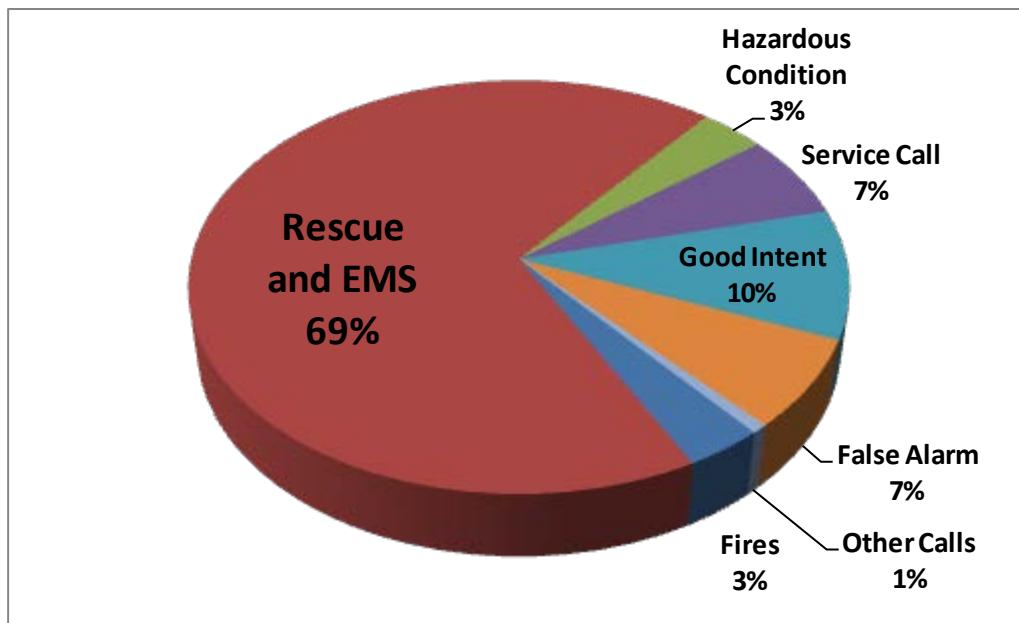

In 2015, fire departments responded to 810,537 incidents in Virginia. These incidents included 27,373 fires, 556,407 rescue and EMS incidents, 28,911 hazardous condition calls, 53,385 service calls, 82,094 good intent calls, 56,729 false calls and 5,638 other calls. (See Table 1.) There were 47,704 incidents in which a fire department provided assistance (mutual or automatic aid given) to another jurisdiction. In addition, there were 312 exposure fires (a fire in a building, structure, vehicle, or outside property resulting from a fire outside that building, structure, vehicle or outside property).

#### Fire and Total Dollar Loss

Fires dollar loss is required for all fire incidents and helps to measure the severity of fire loss in Virginia. In 2015, there were 27,373 fires with a total fire dollar loss reported as more than \$242 million. (See Table 2.) Total fire dollar loss increased by more than \$52 thousand from the amount reported in 2014.

**Table 2. Fire Dollar Loss and Total Loss Summary, Virginia, 2015**

| Dollar Loss            | Total         |
|------------------------|---------------|
| Total Fire Dollar Loss | \$242,385,500 |
| Total Dollar Loss      | \$257,072,224 |

#### Civilian and Fire Service Casualties

In addition, losses also occur when civilian or fire service are injured or killed during an incident. According to the National Fire Incident Reporting System NFIRS, there were 345 civilian injuries and 59 civilian deaths due to fire incidents in 2015. (See Table 3.) The Fire Services had 481 injuries and suffered 1 death with their personnel in 2015, including fire and non-fire incidents.

## **Chapter 1 NFIRS/VFIRS - Introduction**

### National Fire Incident Reporting System (NFIRS)

The Virginia Department of Fire Programs (VDFP) manages the reporting of Virginia's incidents to the National Fire Incident Reporting System (NFIRS). NFIRS is the nationwide system for tracking all emergency responses with fire departments across the country. By reporting their incidents to NFIRS, fire departments in the United States document the details of their incidents for legal purposes and also document the overall activities of their fire departments. By reporting their incidents, fire departments get credit for everything that they do in responding to incidents in their area. NFIRS also helps to show the value of a fire department's public service to their community. By convention, some states, including Virginia, use the acronym of the national system, NFIRS, and modify it slightly when referring to their own state's incident data. So, for example, when discussing Virginia's incident data the acronym *VFIRS* may be used, unfortunately this has led to some confusion. It is important to recognize there is no separate Virginia incident reporting system for tracking fire and emergency response calls. All state-specific data is extracted from the national system.

NFIRS is an all-type incident reporting system. Fire departments should be reporting all their emergency responses to NFIRS. All types of calls such as fires, EMS, hazmat, etc. should be reported to reflect all incidents being handled.

Participation in NFIRS is essential, since important decisions, such as decisions with grant funding, are made at the fire department, local, state and federal levels using the incident data reported to the system. By analyzing the incident data, information on the frequency of call types, the causes of fires, the amount of loss from fires can easily be identified to help develop appropriate fire prevention plans, to essentially help "Fight Fires with Facts".

### Reporting Deadlines

Timeliness of reporting is critical to ensure the availability of current incident data. Fire departments should be consistently reporting incidents on a monthly basis. All incidents shall be reported (submitted) no later than the 15th of the calendar month for incidents that occurred in the previous month.

### Quality Control

In order to make sure that we have accurate and reliable data, quality control audits are performed at different times during the collection year. Reports are produced for each fire department in Virginia identifying incidents for them to verify and correct as needed. The reports included are (1) Detailed Report of Invalid Incidents with Critical Error Messages, (2) High Dollar Loss Incident Report, (3) High Response / Duration Time Incident Report, (4) Fire Incidents with No Dollar Loss or Zero Dollar Loss

Report, and (5) Undetermined or Unresolved Fire Incidents for Factors Related to the Ignition of the Fire Report. By getting departments to be aware of issues with their data, they will understand the importance of making sure that they have good data.

#### Program Team

The NFIRS program for the Commonwealth of Virginia is managed and administered by the following VDFP staff: **Rob Magnotti, Information and Statistics Manager**, and **Bailey Martin, Program Support Technician**.

#### Acknowledgements

We would like to thank all the fire departments in Virginia for their efforts in reporting their incidents to NFIRS. The program could not be successful without their valuable support and contribution. Fire departments in Virginia truly understand the importance of documenting what they do each day and they value the benefits of reporting their emergency responses.

## Chapter 2 VFIRS - The State View

Fire service in Virginia has the responsibility to be prepared to respond to many different types of situations and events. Firefighters respond to all types of fires, but also have to be equipped to handle medical emergencies, rescue operations, hazardous conditions, and severe weather occurrences. Fire service also performs many tasks of providing public service assistance to their local communities.

### Incident Types

In 2015, fire departments responded to 810,537 incidents in Virginia. These incidents included 27,373 fires, 556,407 rescue and EMS incidents, 28,911 hazardous condition calls, 53,385 service calls, 82,094 good intent calls, 56,729 false calls and 5,638 other calls. (See Table 5.) There were 47,704 incidents in which a fire department provided assistance (mutual or automatic aid given) to another jurisdiction. In addition, there were 312 exposure fires (a fire in a building, structure, vehicle, or outside property resulting from a fire outside that building, structure, vehicle or outside property).

## Casualties

Casualties are unfortunate losses that result from incidents and have a great impact on the public resulting in personal loss to families. Fire service equally suffers the loss and additionally results in a reduction of staff providing services. In 2015, according to what was reported in the National Fire Incident System (NFIRS) there were a total of 550 civilian fire casualties (455 injuries and 95 deaths) caused by fire incidents. (See Table 13.) Fire service casualties with all types of incidents totaled 482 casualties (481 injuries and 1 death). (See Table 14.)

#### Fire Incidents

Fire departments reported in 2015 that they responded to 21,012 fire incidents during the year. (See Table 15.) Structure fires (39.5%) made up the largest incident category with fire incidents, while natural vegetation fires accounted for 21.4 percent. (See Figure 8.) Mobile property vehicle fires accounted for nearly 18 percent of the total fires in 2015.

### Aid Given or Received

Fire departments can give/receive aid to/from other fire departments in their area for incident calls that require additional resources. The aid given can be either mutual (fire departments request need for assistance) or automatic (pre-arranged agreement to aid).

Figure 10. Aid Given or Received, Virginia, 2015

Ninety-one percent (90.9%) of the incidents responded to by fire service in Virginia were incidents that did not involve mutual or automatic aid given or received. (See Figure 10.) The departments did not receive any aid from other fire departments or did not give aid to other fire departments. Fire departments in Virginia gave mutual / automatic aid about 6 percent of the time.

## Resources

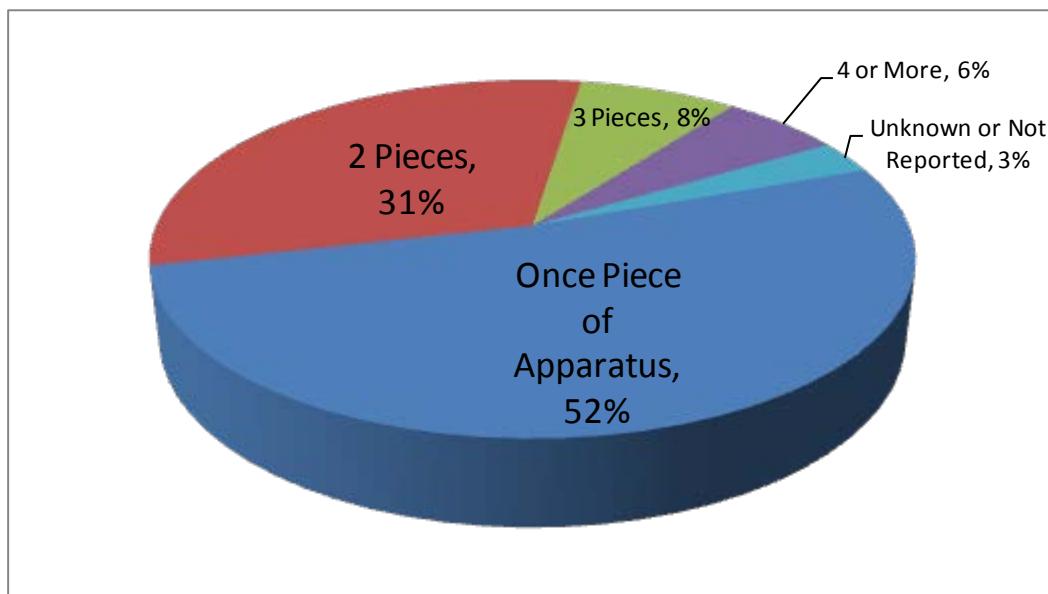

Fire service resources that respond to an incident consist of apparatus and personnel and can be classified as suppression, EMS, or other. The average number of apparatus that responded to an incident was 2.0. (See Table 22.) Fires required the largest number of apparatus for an incident and accounted for an average (mean) of 5.3 total apparatus per incident.

Fifty-one percent (51%) of all reported incidents in 2015 required only one piece of apparatus to respond to the incident. Two pieces of apparatus were needed with 31% of the total incidents. (See Figure 16.)

**Figure 16. Percentage of Total Apparatus Responding to an Incident, Virginia, 2015**

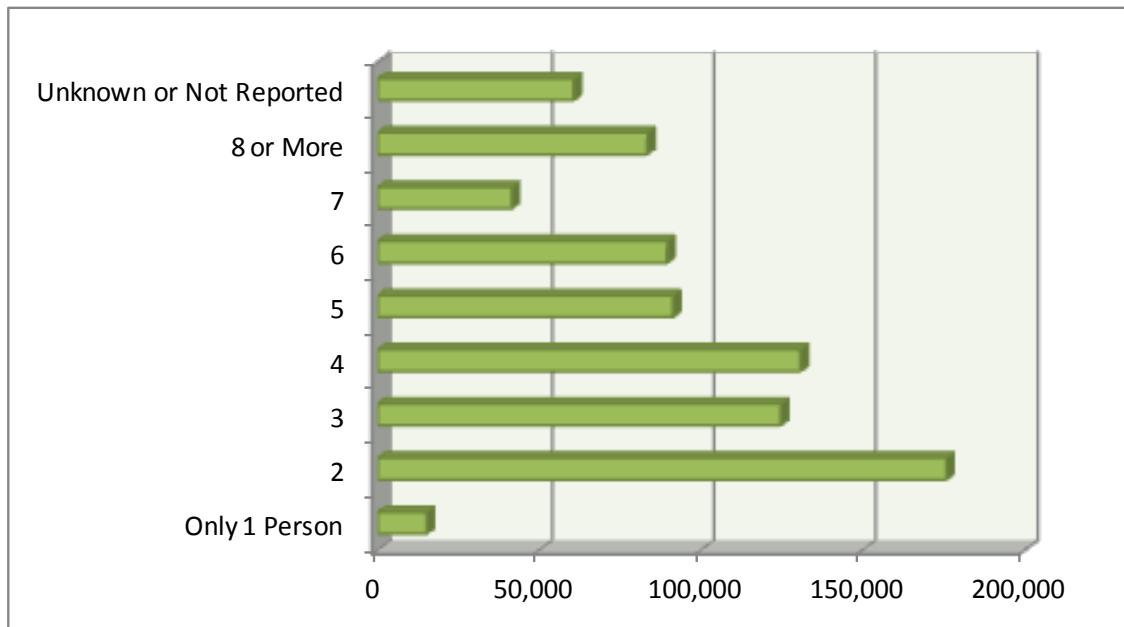

The average total personnel that responded to an incident scene was 4.6. (See Table 23.) Fire incidents required the largest amount of personnel for an incident with an average of 9.1 total personnel per incident. About fifty-five percent (54.9%) of all incidents needed 1 to 4 fire service personnel to respond to the emergency.

### Total Hours Committed

The total hours committed represents the total amount of time needed to handle and control an incident. Total hours committed for an incident is calculated by multiplying the total number of personnel by the duration time of the incident (Difference between the last unit cleared date/time and the alarm date/time).

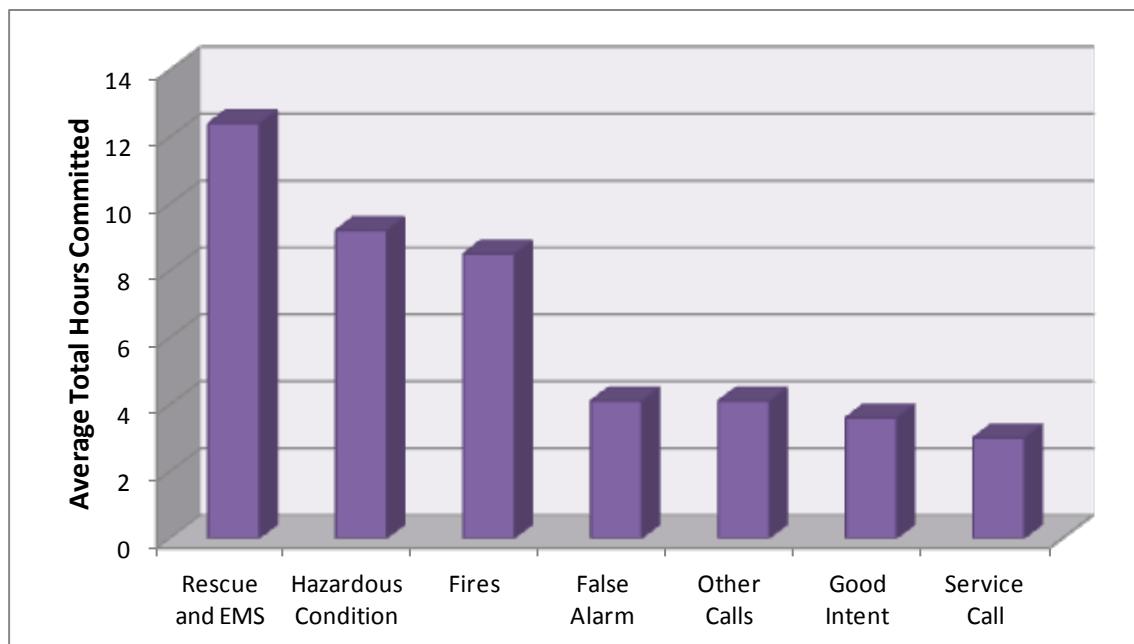

Fire service in Virginia accumulated a total of 3,112,968 (3.1 million) hours responding to incidents in 2015. (See Table 24.) Fire calls had the largest average total hours committed in 2015 with 12.4 hours. (See Figure 18.)

## Property Use

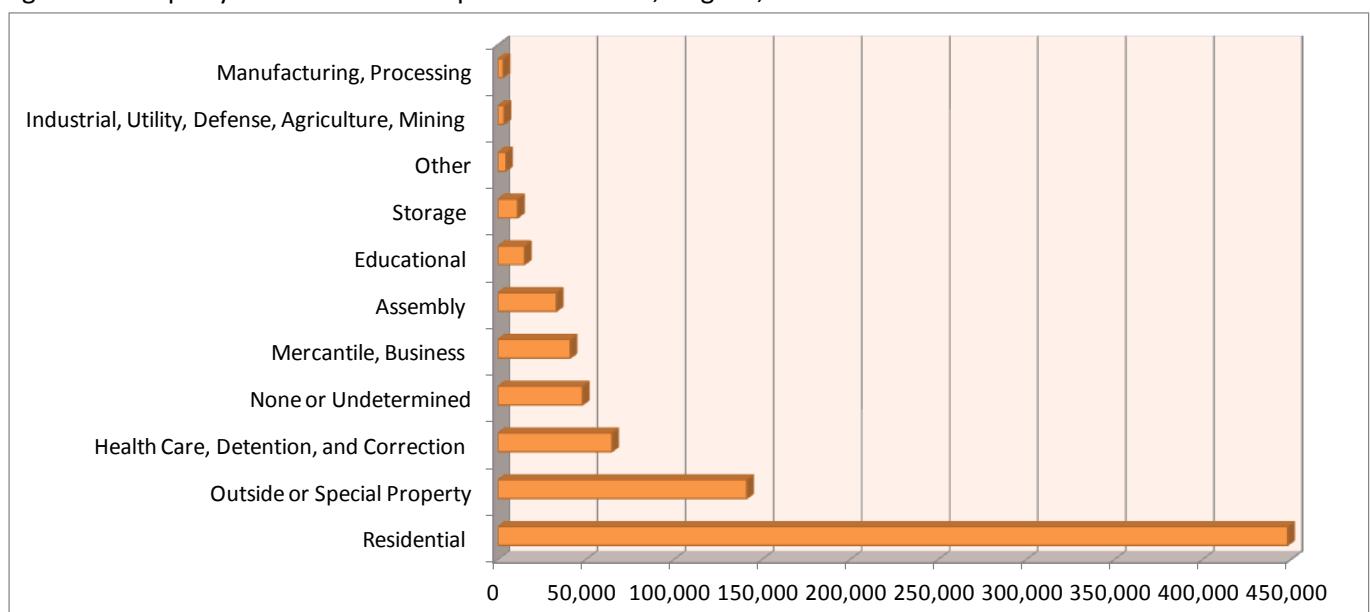

Fire service incidents occurred at many different types of establishments and locations in Virginia in 2015. Each location of an incident had a specific property use. Fifty-five percent (55.2%) of incidents that fire service responded to occurred with residential property use establishments. (See Table 25.) Seventeen percent (17.4%) of incidents occurred at a location outside or with special property use.

NOTE: Intentional / Incendiary fire incidents include all fire incidents except incident types 113-118 and 150-155 and are coded as either an intentional fire (Cause of Ignition=1) on the fire module or an incendiary fire (Wildland Fire Cause=7) on the Wildland Fire module. Aid given (mutual or automatic) incidents were excluded and exposure incidents were included with the numbers.

Note: Data is compiled from information reported to the National Fire Incident Reporting System (NFIRS) for 2015 as of 05/17/2016. For all frequency or incident counts, mutual/automatic aid given and fire exposure incidents were excluded from the numbers. For casualty statistical information, mutual/automatic aid given incidents were included for all fire service and excluded for all civilian data, and, in addition, fire exposure incidents were included with all casualty numbers. For dollar loss amounts, mutual/automatic aid given incidents were excluded and exposure incidents were included with the numbers.\* Greenville County does not currently have fire service in their locality. Emergency response for their area is handled by Jarrett Vol. Fire Dept. (FDID 18301) and Emporia Fire Dept. (FDID 59500).

\*\* The City of Falls Church (FIPS 610) currently participates in NFIRS, but due to contractual arrangements with Arlington County (FIPS 013), their statistical information cannot be tabulated and, therefore, is combined with the incidents from Arlington County.

Note: Data is compiled from information reported to the National Fire Incident Reporting System (NFIRS) for 2015 as of 6/27/2016. The above monthly incident counts exclude mutual/automatic aid given and fire exposure incidents. The total number of fire departments may not match other tables due to different groupings of departments by locality.

Note: Greensville County does not currently have fire service in their locality. Emergency response for their area is handled by Jarrett Vol. Fire Dept. (FDID 18301) and Emporia Fire Dept. (FDID 59500).

\* Falls Church Vol. Fire Dept. (FDID 61000) currently participates in NFIRS, but due to contractual arrangements with Arlington Co. Fire Dept. (FDID 01300), their statistical information cannot be tabulated and, therefore, is combined with the incidents from Arlington County.

Note: Data is compiled from information reported to the National Fire Incident Reporting System (NFIRS) for 2015 as of 6/27/2016. The above monthly incident counts exclude mutual/automatic aid given and fire exposure incidents. The total number of fire departments may not match other tables due to different groupings of departments by locality.

Note: Greensville County does not currently have fire service in their locality. Emergency response for their area is handled by Jarrett Vol. Fire Dept. (FDID 18301) and Emporia Fire Dept. (FDID 59500).

\* Falls Church Vol. Fire Dept. (FDID 61000) currently participates in NFIRS, but due to contractual arrangements with Arlington Co. Fire Dept. (FDID 01300), their statistical information cannot be tabulated and, therefore, is combined with the incidents from Arlington County.

Note: Data is compiled from information reported to the National Fire Incident Reporting System (NFIRS) for 2015 05/17/2016. For all frequency or incident counts, mutual/automatic aid given and fire exposure incidents were excluded from the numbers. For casualty statistical information, mutual/automatic aid given incidents were included for all fire service and excluded for all civilian data, and, in addition, fire exposure incidents were included with all casualty numbers. For dollar loss amounts, mutual/automatic aid given incidents were excluded and exposure incidents were included with the numbers.

\* Greenville County does not currently have fire service in their locality. Emergency response for their area is handled by Jarrett Vol. Fire Dept. (FDID 18301) and Emporia Fire Dept. (FDID 59500).

\*\* The City of Falls Church (FIPS 610) currently participates in NFIRS, but due to contractual arrangements with Arlington County (FIPS 013), their statistical information cannot be tabulated and, therefore, is combined with the incidents from Arlington County.

Note: Data is compiled from information reported to the National Fire Incident Reporting System (NFIRS) for 2015 as of 6/27/2016. The above monthly incident counts exclude mutual/automatic aid given and fire exposure incidents. The total number of fire departments may not match other tables due to different groupings of departments by locality.

Note: Greensville County does not currently have fire service in their locality. Emergency response for their area is handled by Jarrett Vol. Fire Dept. (FDID 18301) and Emporia Fire Dept. (FDID 59500).

\* Falls Church Vol. Fire Dept. (FDID 61000) currently participates in NFIRS, but due to contractual arrangements with Arlington Co. Fire Dept. (FDID 01300), their statistical information cannot be tabulated and, therefore, is combined with the incidents from Arlington County.

Note: Data is compiled from information reported to the National Fire Incident Reporting System (NFIRS) for 2015 as of 05/17/2016. For all frequency or incident counts, mutual/automatic aid given and fire exposure incidents were excluded from the numbers. For casualty statistical information, mutual/automatic aid given incidents were included for all fire service and excluded for all civilian data, and, in addition, fire exposure incidents were included with all casualty numbers. For dollar loss amounts, mutual/automatic aid given incidents were excluded and exposure incidents were included with the numbers.

\* Greenville County does not currently have fire service in their locality. Emergency response for their area is handled by Jarrett Vol. Fire Dept. (FDID 18301) and Emporia Fire Dept. (FDID 59500) incidents were excluded and exposure incidents were included with the numbers.

\*\* The City of Falls Church (FIPS 610) currently participates in NFIRS, but due to contractual arrangements with Arlington County (FIPS 013), their statistical information cannot be tabulated and, therefore, is combined with the incidents from Arlington County.

Note: Data is compiled from information reported to the National Fire Incident Reporting System (NFIRS) for 2015 as of 6/27/2016. The above monthly incident counts exclude mutual/automatic aid given and fire exposure incidents. The total number of fire departments may not match other tables due to different groupings of departments by locality.

Note: Greensville County does not currently have fire service in their locality. Emergency response for their area is handled by Jarrett Vol. Fire Dept. (FDID 18301) and Emporia Fire Dept. (FDID 59500).

\* Falls Church Vol. Fire Dept. (FDID 61000) currently participates in NFIRS, but due to contractual arrangements with Arlington Co. Fire Dept. (FDID 01300), their statistical information cannot be tabulated and, therefore, is combined with the incidents from Arlington County.
